

EUROPEAN PROJECT SEMESTER - TEAM 5

RIGID WING SAIL

CONTROL

Synchronized control flaps, optimizing the sail position

TECHNOLOGY

Sustainable energy generation devices

DESIGN

Rigid sail with a 360 degrees freely rotation for an autonomous boat

DEVELOPMENT

Waterproof materials and components for extensive missions

EFFECTIVITY

A robust, flexible and a cutting edge wing sail in terms of technology . Based on maritime plywood, we designed a light and fast sail fulfilling all the requirements of innovative rigid wing sails.

24/7 SUPPORT

We provide 24/7 support. We place your business needs in the most utmost importance. We can be reached via e-mail, phone and through our social media channels.
